

Moves within the same building for Switched Access Services are considered to be Service Rearrangements, Service Rearrangement charges are specified in Section 6.7.1 of BellSouth Telecommunications Inc.'s Tariff F.C.C. No. 1.

For Special Access Services, when a service is moved to a new location within the same building, the charge for the move will be an amount equal to one-half of the first service installed nonrecurring charge for the service termination affected.

The following activities may be involved in connection with ACTL moves when the ASR is submitted to BellSouth's ICSC from the customer:

- The customer or the customer's authorized agent contacts the BellSouth ICSC and places an ASR that specifies each Trunk, Line, Voice Grade, DS0, DS1 or DS3 circuit to be moved to another location.
- As described in the responses to Interrogatory 2 (a) and 2 (b), the ASR process begins upon receipt of the ASR by the ICSC. During the initial verification by the ICSC, any one discrepancy or question regarding the ASR could warrant further information to be supplied by the ordering customer.
  - Some examples of ICSC verification are to determine if the customer placing the ASR will continue to be the customer of record for the services being moved or if the customer of record will change for the services being moved.
    - For example, will the existing customer be converting their circuit's to another customer's billing name and address?

- If the answer is yes, a Transfer of Service (contract arrangement between two or more customers) must be initiated. This Transfer of Service contract, if not initiated by the customer will be initiated by BellSouth, will allow the recipient of the access service to retain the existing service and will minimize the nonrecurring charges associated with the move.
- Are all circuits on the account to be moved, or only a few of the circuits will be moving?
  - If the answer is no, additional work must be performed by the ICSC representative to set up an additional billing account number of the circuits to remain at the original location.
  - Will the carrier's account number be changing in any way?
    - If the answer is no, issue the orders as written.
- The ICSC will determine if a "Project" will be established to handle customer's requests for moves. "Projects" are established routinely by the BellSouth ICSC upon request to BellSouth Customer Account Teams or projects are established by the Customer Account Teams upon receipt of a "Planning Letter" from the customer. Projects are typically assigned to respond to customer's demands for responsible employee resources to be available to the customer to make reconfigurations, moves, or when

converting facilities from one service type to another service type so that customer satisfaction is assured. Additionally, projects are established for BellSouth customers when requested by the customer.

- Upon determination of Transfer of Service and/or establishment of a customer Project, BellSouth would begin analyzing the type of move requested.

Following are the different types of ACTL moves as described in the Tariff:

(1) Customer's wire center serving area remains the same; customer desires to move the point of termination at the customer's premises from one location to another location.

- Moves to a different building within the same wire center serving area are treated as reconfigurations. Reconfigurations allow customers to move only one terminating point on the circuit, in this instance, the customer point of presence end of the circuit.
- Upon the verification of the accuracy of the ASR submitted by the customer (some of which are detailed in response to this interrogatory) the steps as outlined in the responses to ACSI Interrogatory No. 2 will begin.

(2) Customer's wire center serving area changes; customer desires to move to a new location, therefore the point of termination as well as the wire center serving area changes.

- Moves to a different building, or customer premises in a wire center serving area different than the customer's existing serving wire center serving area will be

treated as a service discontinuance and start of new service and full nonrecurring charges will apply.

- Upon the verification of the accuracy of the ASR submitted by the customer (some of which are detailed in response to this interrogatory) the steps as outlined in the responses to ACSI Interrogatory No. 2 will begin.

(3) Customer's wire center serving area remains the same; customer desires to move the point of termination at the customer's premises from the customer's premises to a Virtual Expanded Interconnection Service inside the BellSouth wire center serving the customer's premises.

- Moves within the same wire center serving area are treated as reconfigurations. Reconfigurations allow customers to move only one terminating point on the circuit, in this instance, the customer point of presence end of the circuit.
- Upon the verification of the accuracy of the ASR submitted by the customer (some of which are detailed in response to this interrogatory) the steps as outlined in the responses to ACSI Interrogatory No. 2 will begin.

(4) Customer's wire center serving area changes; customer desires to move to a new location, therefore the point of termination as well as the wire center serving area changes.

- Moves to a different building in a wire center serving area different than the customer's existing serving wire center serving area will be treated as a service discontinuance and start of new service and full nonrecurring charges will apply.

- Upon the verification of the accuracy of the ASR submitted by the customer (some of which are detailed in response to this interrogatory) the steps as outlined in the responses to ACSI Interrogatory No. 2 will begin.

(3)(b) The customer's point of presence for Special Access services could not be moved in order to qualify for BellSouth's Network Optimization Waiver. Service Reconfigurations have been explained in part (a) of this interrogatory. Regulations for the Network Optimization Waiver are clearly described in BellSouth Telecommunications Inc.'s Tariff F.C.C. No. 1, Section 7.4.20.

Interrogatory No. 4. Consistent with Instruction No. 2, describe in detail the circumstances in which BellSouth has calculated or will calculate different nonrecurring charges for different customers reconfiguring a DS1 or DS3 access facility. Identify all tariff provisions and documents that relate to or refer to those circumstances. Answer this Interrogatory for the period October 1, 1994, through the present.

ANSWER No. 4:

Respondent objects to Interrogatory No. 4 on the grounds that the information requested is unduly burdensome to provide. BellSouth has already provided the relevant tariff provisions relating to nonrecurring reconfiguration charges for DS1 and DS3 facilities. Exact nonrecurring charges which have or will be assessed to our individual customers depends upon factors such as the number and capacity of circuits involved, and thus the "circumstances" in which different nonrecurring

**Interrogatory No. 5.** Consistent with Instruction No. 2, for each calendar quarter since October-December, 1994, inclusive, through the present, provide the numbers of both the DS1 and DS3 entrance facility circuits that have been reconfigured by BellSouth customers.

**ANSWER No. 5:**

**Reconfigurations - the numbers shown below are USOC quantities extracted from CABS billing data tapes for the periods specified for each DS1 and DS3 entrance facility circuit reconfigured:**

		<u>1994</u> <u>4Qtr</u>	<u>1995</u> <u>1Qtr</u>	<u>1995</u> <u>2Qtr</u>	<u>1995</u> <u>3Qtr</u>	<u>1995</u> <u>4Qtr</u>	<u>1996</u> <u>1Qtr</u>
	<b><u>Special:</u></b>						
5(a)	DS1 Entrance Facility	13	4	422	1	348	725
5(b)	DS3 Entrance Facility	N/A	N/A	N/A	N/A	N/A	N/A

	<b><u>Switched:</u></b>						
5(c)	DS1 Entrance Facility	3	0	93	0	1	168
5(d)	DS3 Entrance Facility	0	0	0	0	0	0

N/A = Not Applicable

Additional reconfigurations were also performed as shown in Respondent's Answer to Interrogatory No. 9.

**Interrogatory No. 6.** Consistent with Instruction No. 2, for each calendar quarter since October-December, 1994, inclusive, through the present provide the number of DS1 and DS3 entrance facility circuits that have been reconfigured at the request of BellSouth customers that, on the one hand, were part of an ACTL Move where BellSouth remained the provider of the reconfigured entrance facilities, and those DS1 and DS3 entrance facility circuits that, on the other hand, were part of an ACTL Move where BellSouth was no longer the provider of entrance facilities after the reconfiguration..

**ANSWER No. 6:**

**DS1 Entrance Facilities:**

6(a) Inasmuch as the Tariff does not distinguish between nonrecurring charges between ACTL moves where BellSouth remained the provider of the reconfigured entrance facilities and those entrance facility circuits that were part of

a reconfiguration where BellSouth was no longer the provider of entrance facilities, there is no reason for BellSouth to retain data which distinguishes between the two. Data is not available beyond that provided in Interrogatory No. 5.

**DS3 Entrance Facilities:**

6(b) Inasmuch as the Tariff does not distinguish between nonrecurring charges between ACTL moves where BellSouth remained the provider of the reconfigured entrance facilities and those entrance facility circuits that were part of a reconfiguration where BellSouth was no longer the provider of entrance facilities, there is no reason for BellSouth to retain data which distinguishes between the two. Data is not available beyond that provided in Interrogatory No. 5.

Interrogatory No. 7. Consistent with Instruction No. 2, with respect to BellSouth's answers to Interrogatory No. 6, provide the number of DS1 and DS3 facilities for which the ACTL Move Nonrecurring Charges were either waived or partially waived both when BellSouth remained the provider of entrance facilities after reconfiguration and when it was not.

**ANSWER No. 7:**

**DS1 Facilities:**

7(a) The Tariff does not provide for either a waiver or partial waiver in either circumstance. In addition, inasmuch as the Tariff does not distinguish between reconfiguration nonrecurring charges and ACTL moves where BellSouth remained the provider of the reconfigured entrance facilities and those entrance facility circuits that were part of reconfiguration where BellSouth was no longer the

provider of entrance facilities, there is no reason for BellSouth to retain data which distinguishes between the two. Data is not available beyond that provided in Interrogatory No. 5.

**DS3 Facilities:**

7(b) Inasmuch as the Tariff does not distinguish reconfiguration nonrecurring charges and ACTL moves where BellSouth remained the provider of the reconfigured entrance facilities and those entrance facility circuits that were part of a reconfiguration where BellSouth was no longer the provider of entrance facilities, there is no reason for BellSouth to retain data which distinguishes between the two. Data is not available beyond that provided in Interrogatory No. 5.

Interrogatory No. 8. Describe in detail the circumstances in which BellSouth has waived or waives all or part of the ACTL Move Nonrecurring Charges. Identify all tariff provisions relating to each such waiver or partial waiver. Answer this question [sic] for the period October 1, 1994, through the present.

**ANSWER No. 8:**

BellSouth is without knowledge or information sufficient to answer this interrogatory.

BellSouth's tariff does not contain provisions for ACTL Move Nonrecurring Charges to be waived.

Interrogatory No. 9. Consistent with Instruction No. 2, for each calendar quarter since October-December, 1994, inclusive through the present, provide the numbers of

both DS1 and DS3 entrance facility circuits that have been reconfigured by BellSouth customers pursuant to BellSouth's Network Optimization Waiver.

**ANSWER No. 9:**

**Network Optimization Waiver - the numbers shown below are USOC quantities extracted from CABS billing data tapes for the periods specified for DS1 and DS3 entrance facilities reconfigured pursuant to NOW.]**

		<b><u>1994</u></b>	<b><u>1995</u></b>	<b><u>1995</u></b>	<b><u>1995</u></b>	<b><u>1995</u></b>	<b><u>1996</u></b>
		<b><u>4Qtr</u></b>	<b><u>1Qtr</u></b>	<b><u>2Qtr</u></b>	<b><u>3Qtr</u></b>	<b><u>4Qtr</u></b>	<b><u>1Qtr</u></b>
	<b><u>Special:</u></b>						
9(a)	DS1 Entrance Facility	N/A	N/A	N/A	N/A	25	8
9(b)	DS3 Entrance Facility	N/A	N/A	N/A	N/A	2	9
	<b><u>Switched:</u></b>						
9(c)	DS1 Entrance Facility	N/A	N/A	N/A	N/A	0	0
9(d)	DS3 Entrance Facility	N/A	N/A	N/A	N/A	2	1

N/A = Not Available. Pursuant to a search of the CABS billing tapes for the period October, 1994, through March, 1996, it was determined that data is only available for the periods shown. Due to a delay in the programming schedules for the CABS database at the commencement of the NOW, records are not available to identify NRCs from October, 1994 through September, 1995.

The following individuals were responsible for preparing the foregoing answers:

ACCESS SERVICE

7 - Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.20 Network Optimization Waiver (NOW)

(M)

(A) The Network Optimization Waiver (NOW) is an offering that waives nonrecurring charges for certain Switched and Special Access Services where customers reconfigure their existing Telephone Company provided network onto certain LightGate services and SMARTRing services. In addition, termination liability charges are also waived for upgrades to higher level services or reductions in existing service capacities under certain circumstances. Specific requirements must be satisfied in order for charges to be waived, as follows:

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(1) Nonrecurring charges set forth in Sections 6 and 7 of this tariff will be waived when a customer reconfigures existing Special Access Voice Grade, DDAS, DS1 (excluding SMARTPath service), LightGate service, SMARTRing service and Switched Access services that are groomed or rolled over onto LightGate service or SMARTRing services.

(M)

(M)

(M)

(M)

(M)

(M)

(2) Nonrecurring charges will be waived for new LightGate and SMARTRing service systems, nodes, and associated channel interfaces to which existing services are reconfigured as a direct result of NOW. Nonrecurring charges for Access Order Modifications and Cancellation of Access Orders, as contained in Sections 5.3 and 5.4 respectively of this Tariff will not be waived. Nonrecurring charges for new channel systems and related channel interface charges not directly established because of reconfiguration grooming and/or rollovers, will not be waived.

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(3) The customer's LightGate services and SMARTRing services, to which the network services are reconfigured, must be ordered under Channel Services Payment Plans (CSPP). However, individual DS1 and/or DS3 channel interfaces associated with LightGate service and SMARTRing service and associated Switched Access services may be provided under month-to-month terms if the existing services were provided under month-to-month rates.

ACCESS SERVICE

7 - Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.20 Network Optimization Waiver (NOW) (Cont'd)

(A) (Cont'd)

- (4) NOW requests will be processed as projects for each designated Point of Presence (POP), Access Carrier Terminal Location (ACTL) or end user location, and all associated connect and disconnect order Access Service Requests (ASRs) must be placed at the same time. All ASRs must be received on or after August 22, 1994 but prior to July 21, 1995 with due dates of no later than April 21, 1996. Only one reconfiguration plan will be permitted per POP/ACTL or end user location. The NOW will terminate April 21, 1996. (C)(x)  
(C)(x)
- (5) Customers are not permitted to move their POP or end user location as part of a NOW project.
- (6) Termination Liability Charges will be waived for Special Access service upgrades from DDAS or DSL service to LightGate service or SMARTRing service, and from LightGate service to SMARTRing service if the resulting CSPP service period of the reconfigured network is at least as long as the existing CSPP service period remaining or the minimum CSPP period, whichever is greater. Additionally, customers may decrease existing LightGate service system or SMARTRing service networks to smaller system sizes under the NOW offering, given the same minimum CSPP time period constraints above, without termination liability as long as equivalent VG, DDAS, and non-channelized DSL channel services are maintained on the reconfigured network.
- (7) Nonrecurring charges will be waived for Switched Access Services that are groomed or rolled over onto LightGate service or SMARTRing services under NOW specifications. In addition, they are also subject to the following requirements:
- If the number of installed trunks exceeds the number of trunks to be disconnected, the customer must provide, at the time the ASRs are placed, justification based upon standard engineering methods.
  - When multiple ASRs are required, the ASRs must be submitted at the same time and the customer must provide related purchase order numbers pertaining to multiple ASRs.

(x) Issued under authority of Special Permission No. 95-525.

## ACCESS SERVICE

### 7 - Special Access Service (Cont'd)

#### 7.4 Rate Regulations (Cont'd)

##### 7.4.20 Network Optimization Waiver (Cont'd)

(B) Notwithstanding the provisions of 7.4.20(A) preceding, if a customer has submitted to BellSouth, by July 21, 1995, a letter indicating its intent to submit ASRs for the purpose of accomplishing the rearrangement described in 7.4.20(A) and specifying, at a minimum:

(C)(x)

- Customer Name,
- Access Carrier Name Abbreviation (ACNAs),
- Carrier Identification Codes (CICs),
- Purchase Order Number (PON),
- Point of Presence (POP) Access Carrier Terminal Location (ACTL),
- Desired Interface Level at POP after Rearrangement,
- Target Completion Date for POP Rearrangement,
- Existing Quantities Involved in Rearrangement by Number of DS3s, Number of DS1s and Number of Trunks/Lines per POP/ACTL, and
- Expected Quantities Resulting by Number of DS3s, Number of DS1s and Number of Trunk/Lines per POP/ACTL,

the waiver specified in 7.4.20(A) will apply for quantities indicated in such letter for each POP/ACTL indicated if:

- ASRs for such quantities are submitted no later than January 21, 1996;
- the due dates of those ASRs are no later than April 21, 1996,
- the rearrangements otherwise qualify for the waiver pursuant to the requirements of 7.4.20(A).

(C)(x)

(C)(x)

##### 7.4.21 Voice Grade Service

Monthly rates and nonrecurring charges as specified in 7.5.3 following apply for Voice Grade Service.

Voice Grade Service is available under several payment plans: Voice Grade Rate Stability Plan (with a minimum of 36 months and a maximum of 60 months), Month-to-month (with a minimum of one month), Plan A (24-48 Months) or Plan B (49-72 Months). The Voice Grade Rate Stability Plan is provided as outlined in 7.4.13 preceding. Plans A and B are provided under conditions specified in the Channel Services Payment Plan (CSPP), 2.4.8(A) preceding, except as modified following:

(x) Issued under the authority of Special Permission No. 95-525.
